DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: the status of the CIP mentioned on page 1 of the specification must be updated.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1, 3 and 4 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Snell (Pat. No. 6,263,245).

Claim Rejections - 35 USC § 102/103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 2 is rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Snell.
6. Regarding claim 2, the examiner considers the requisite power source in unit 100 to be connected to the portable unit 110 when the two units are engaged by virtue of the mechanical connection of one housing to the other. In any event, the examiner takes

Art Unit: 3766

Official Notice that connection systems such as USB and Firewire (note col. 6, lines 53-60) allow for plug-in peripheral devices to be powered and/or recharged by primary units that typically plug into a buildings electrical power system at the wall outlet. Such arrangements allow for convenient recharging and/or conserve the portable device's battery power when reliance on autonomous power is unnecessary.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kennedy Schaetzle whose telephone number is 571 272-4954. The examiner can normally be reached on M-W and F from 9:30 -6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert E. Pezzuto can be reached on M-F at 571 272-6996. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
